Good evening professor.

I wanted to personally thank you for the class content, experience, and challenge of ESE 345. I've been looking forward to this class since I learned of its existence in freshman year.

I learned more than I expected, and further concluded and gained insight to my strengths and weaknesses as an engineer, and thank you for being my professor through this semester. I know for sure now that I want to continue being an engineer and devote my life to the advancement of computer hardware.

Thank you, and take care this winter. I hope to see you soon either around campus or in a graduate class if/when I make it. Good luck with your health and complications and bless your family for the holiday season.

Sincerely,  
Chris Nielsen

P.S. What did you grade / think about our Project. I would love to know what you thought of it

Hi Chris,

Thank you for your kind words! I wish there were more students like you in my classes. I really enjoyed talking to you and seeing your progress during this semester.

I'm very glad to hear that I helped you on this path.

You and your partner got 22 out of 22 points for the project. Very few teams were able to do that. My congratulations on that, Chris!

Best regards and hope to see you one day in my graduate classes,

MD
